MICROSOFT DYNAMICS 365 BUSINESS CENTRAL & YAVEON PROBATCH.

A SYSTEM THAT MAKES YOUR JOB EASIER.

With an Enterprise Resource Planning System (ERP), you have total clarity. Discover integrated inventory management and finance management, paired with visibility of existing resources. In real-time. The result: You increase your productivity, prevent errors, and save valuable time.

An ERP also creates a uniform database. So all departments know precisely where to find which information. This increases visibility in your company and facilitates the exchange of information. If you wish, you can also connect other functions. For example, an Enterprise Content Management for digitalizing your vacation and travel requests, return processes as well as digitally storing and processing documents.

Tested, used, and proven: YAVEON trusts Microsoft and uses the ERP system Microsoft Dynamics 365 Business Central - formerly NAV.

YAVEON

YAVEON

CRM WITH MICROSOFT DYNAMICS 365 FOR CUSTOMER ENGAGEMENT.

KNOW WHAT THE CUSTOMER WANTS.

The customer is the focus of a Customer Relationship Management (CRM) system. Simply maintain the data and off you go. Each company has its way of working, you choose the type that suits you best. Do you mainly work in a B2B environment? Use your CRM as a collection point for contacts, document all activities, and plan actions. The end customer is your direct contact? Then you need to know how they are feeling – the system allows you to evaluate their mood on social networks or behavior on your website. You save effort, avoid failed campaigns, and reach your defined target group.

CUSTOMER LOYALTY BRINGS REWARDS.

Whether you are using your CRM as a "golden address book", planning campaigns, or evaluating options: With Microsoft Dynamics 365 for Customer Engagement, you use software that creates connections. The program is part of the Microsoft Dynamics enterprise applications, which as a result gives you a system that operates intuitively. That's how you meet the demands of your customers, maintain an overview, and boost overall job satisfaction.

WITH MICROSOFT POWER BI OR QLIK.

BRING YOUR DATA TO LIFE.

Endless data and information - one wish: a clear and structured presentation of the data, meaningfully evaluated. In short: Reporting as the foundation for intelligent decisions – at the push of a button.

It's that easy with a Business Intelligence (BI) software. Analyze your information in just a few clicks. This enables you to recognize relationships, evaluate data, and draw the right conclusions for your company. The result? You can plan and manage your business processes even better.

HELP YOUR GUT FEELING.

Pure relief – Power BI from Microsoft analyzes your data and visualizes it. Set out in an easy-to-understand structure. The ideal foundation to support your gut feeling in search of the right decision.

To make sure everything runs smoothly, YAVEON provides consulting to ensure a swift realization of your Power BI.
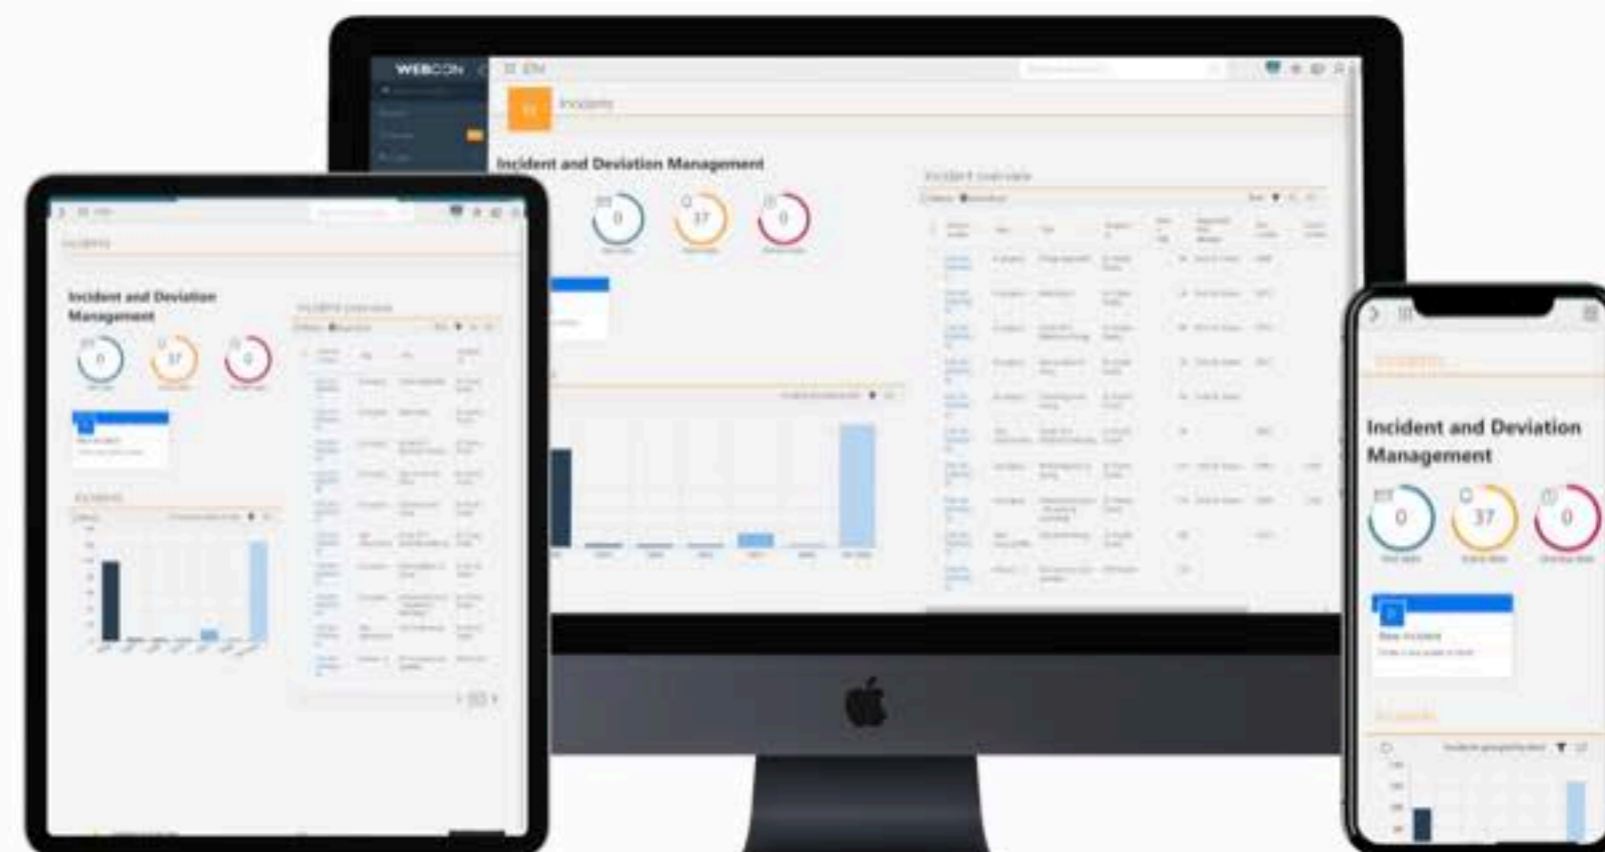

YAVEON

YOUR SOLUTION FOR DIGITAL QUALITY MANAGEMENT

EASILY MAP AND TRIGGER QUALITY EVENTS
APPLY CORRECTIVE ACTIONS - COMPUTER-AIDED.

Have you noticed a discrepancy? Fast action is required. Take action immediately to analyze the cause and initiate a CAPA or 8D process as a corrective measure. Also take precautions to prevent further quality events and carry out performance checks.

Until now, you had a limited overview of this process which required significant resources and even more paper. With Computer-Aided Quality (CAQ), this job just got a lot easier. Equip your enterprise content management system with digital QM modules which enables you to map unstructured data clearly.

- Defined processes result in better communication and teamwork
- Digital processes replace analog paper documents
- Simplify and automate processes with workflows

A QM SOLUTION THAT SUITS YOUR REQUIREMENTS.
